

Every cloud has a storage lining

Joining groups of computers together between different sites provides resilience in case one of the sites is offline – they've formed a cloud of computers.

Effortlessly share files with all your other devices by storing them on a cloud server.

That musical score composed in the study is just as available at the concert hall as when you wrote it, and impromptu photos of the grand children taken on a mobile phone will be ready waiting on your desktop before you even get home.

So what is it?

CloudFS is a RISC OS filing system that allows you to connect to storage held on a remote server.

Your files can be seen by many other devices too, like a Windows PC or even a smart phone.

Key features at a glance

- Integrates with OmniClient as a standard network filing system
 - Appears as an extra drive icon on the left of the icon bar, one per user login
 - Native drag and drop Filer interface
 - Internal design allows for other popular cloud service providers to be added in future
- Supplied with printed manual and a simple double-click-and-go automated installer
- Initially, Swiss based PCloud is the preferred provider
 - Refer friends and relatives to earn extra free storage up to 20GB
 - Plug-ins available for PC platforms: Windows XP, Vista, 7, 8 and 10; Mac OS X 10.8 and later; Linux
 - Apps available for your mobile: Android and iOS

Storage plans:	
10GB	Free forever
20GB	Free (with referrals)
500GB	£3 per month
1TB	£6 per month

Rates correct at time of printing based on a 12 month subscription and include VAT. Based on conversion from USD to GBP and rounded up to the nearest whole pound for clarity.

Specifications

Maximum number of drives	No practical limit
Maximum number of open files	No practical limit
Maximum size of 1 file	&FFFFFFFF bytes on RISC OS 5.20 or later &7FFFFFFFF bytes on earlier versions of RISC OS
Maximum space on 1 drive	16 exabytes
Per file buffering	1 kilobyte
RISC OS file type extensions	Comma plus 3 hexadecimal digit notation, eg. "program,ffb" for BASIC
Mapping for DOS extensions	Uses the MimeMap module

Orderable part numbers

EA-570-7 CloudFS single user + manual
